Handy tip

How to calculate the number of litres of water in a pond
 Length (feet) X Width (feet) X Depth (feet) X 28.27 = Number of litres of water in pond

Algae control

Natural maintenance products

Bacta Supreme (100 ml for 1,000 L of water)

An adequate solution of nitrifying bacteria: Nitrosomonas and Nitrobacter. Decaying of vegetal and animal debris is a source of nitrite, harmful for water life. Nitrifying bacteria transforms it into nitrate that plants can absorb.

| Item # | UPC code | Description | Weight | Sug. retail |
|--------|--------------|------------------------------|---------|-------------|
| BS25 | 057217106629 | Anti-algae bacteria / 250 ml | 245 g | \$10.75 |
